BREVE DESCRIZIONE DEL CORSO

The purpose of this course is to introduce students to the molecular-level understanding of the physicochemical properties of organic substances aimed at characteristics of materials.

PREREQUISITI

General Chemistry

OBIETTIVI FORMATIVI

Ability to manage organic chemistry issues.
Ability to perform basic organic spectral analysis

METODI DIDATTICI

MODALITA' D'ESAME

The exam consists of two parts:
Part 1 - the student is asked to provide a full structural interpretation of FT-IR, MS, 1H- and 13C-NMR spectra and to elucidate the structures of an unknown compound (2 hours);
Part 2 - the student is asked to illustrate two theoretical topics; it is aimed to verify to what extent the student has gained knowledge and understanding of the selected topics of the course and is able to communicate about his understanding.
