BRIEF COURSE DESCRIPTION

The aim of the course is to give students a comprehensive view of the problems related to the taxation of capital income. The taxation of capital will be studied from two different perspectives: from the Treasury's perspective, which aims at collecting revenue in an efficient and equitable way, and from the taxpayer's perspective, which tries to minimize the burden of taxes.

REQUIREMENTS

Principles of microeconomics

COURSE AIMS

Students will develop a foundation for understanding the effects of taxes on consumers' and firms' choices, and for evaluating the ensuing impact on market outcome. They will also be able to understand the basic tax planning strategies both in domestic and international markets.

TEACHING METHODOLOGY

Traditional lectures

ASSESSMENT TYPE

Written exam (multiple choices, exercises and open questions) and optional oral exam and/or short essay.

Lo studente, disabile e/o con DSA, che intende usufruire di un intervento individualizzato per lo svolgimento della prova d'esame deve contattare l'ufficio Integrazione Disabili dell'Università del Salento all'indirizzo paola.martino@unisalento.it

During the June-July session of the exams will be held remotely according to the guidelines published on the University website. The questions will be similar to the ones asked in the written exam. Please take with you a pen and some blank sheets.

FULL SYLLABUS
