BRIEF COURSE DESCRIPTION

The course aims to provide the theoretical and methodological background for skilful use of Geographic Information Systems (GIS) in historical research contexts with a focus on archaeological applications.

REQUIREMENTS

Familiarity with computers (at least at ECDL level)

COURSE AIMS

The lectures and the exercises in front of a computer will provide students with a general overview of GIS technology . Students will be able to:

- Utilize the core components and functionality of a GIS
- Employ a variety of geospatial data types, data sources and metadata management techniques
- Create, manipulate, query and analyze geospatial data

TEACHING METHODOLOGY

The course will consist of lectures and practical tasks to be held in laboratory

ASSESSMENT TYPE

a. Oral exam

The examination aims at assessing:

- -Knowledge and understanding of the contents of the course
- Practical abilities

ASSESSMENT SESSIONS

21 Maggio 2019

14 Giugno 2019

12 Luglio 2019

FULL SYLLABUS

The course aims to provide the theoretical and methodological background for skilful use of Geographic Information Systems (GIS) in historical research contexts with a focus on archaeological applications.

This course will serve as an introduction to GIS technology and its applications to archaeological data management and analysis. Students will learn how to compile, transform, analyze and present sources of archaeological and historical data, and will utilize this information in GIS for cultural resources interpretation and management. References to selected research studies in Classical Archeology will be provided.
