

DIGITAL MANAGEMENT (LB46)

(Lecce - Università degli Studi)

Teaching BUSINESS ANALYTICS

GenCod A005238

Owner professor FABRIZIO DURANTE

Teaching in italian BUSINESS ANALYTICS

Teaching BUSINESS ANALYTICS

SSD code SECS-S/06

Reference course DIGITAL MANAGEMENT

Course type Laurea

Credits 6.0

Teaching hours Ore-Attività-frontale: 36.0

For enrolled in 2019/2020

Taught in 2021/2022

Course year 3

Language INGLESE

Curriculum ECONOMICO

Location Lecce

Semester Primo-Semestre

Exam type Scritto-e-Orale-Congiunti

Assessment Voto-Finale

Course timetable

<https://easyroom.unisalento.it/Orario>

BRIEF COURSE DESCRIPTION

The course presents a vast set of machine learning tools for understanding and making prediction from the data. All the presented tools are illustrated in several real case studies with the software R.

REQUIREMENTS

Basic elements of calculus and statistics for data analysis.

COURSE AIMS

Knowledge and understanding:

- Knowledge and understanding of machine learning models;
- Knowledge and understanding of quantitative tools for business, including segmentation and prediction.

Applying knowledge and understanding:

- Ability to extract relevant information from big dataset for management and business innovation.
- Ability to identify the machine learning models that are suitable to analyse correctly a specific business problem.
- Ability to use a specific programming language to implement machine learning procedures.

Making judgments:

Making judgements on pros and cons of different machine learning tools.

Communication skills:

to present in a concise way the results of a quantitative analysis.

Learning skills:

Ability to formalize in an algorithmic form a problem of interest in business

TEACHING METHODOLOGY

Frontal lectures, exercises, computer labs.

ASSESSMENT TYPE	<p>The written exam consists of several exercises and one or more review questions. The project work consists of the preparation of a quantitative analysis related to the contents of the course with the help of the software R.</p> <p>To pass the exam students must obtain a positive evaluation on both the written exam and the project. Both parts weigh 50% of the total points.</p> <p>Sample of the written exam will be available at the course webpage.</p> <p>There is no difference in the assessment procedures between attending and non-attending students.</p> <p>University of Salento "<i>promuove e garantisce l'inclusione e la partecipazione effettive degli studenti con disabilità</i>" (art. 10 of the Statute). Students that have a disability or impairment that requires accommodations (i.e., alternate testing, readers, note takers or interpreters) could contact the Disability and Accessibility Offices in Student Services: paola.martino@unisalento.it</p>
-----------------	--

ASSESSMENT SESSIONS	See Department webpage.
---------------------	-------------------------

OTHER USEFUL INFORMATION	More information will be available on the course webpage at formazioneonline.unisalento.it
--------------------------	--

FULL SYLLABUS	<p>Introduction to Data Science and Machine Learning.</p> <p>Linear Model. Non-linear Regression.</p> <p>Cross validation.</p> <p>Shrinkage methods. Lasso.</p> <p>K-Nearest neighbour algorithms.</p> <p>Classification. Logistic regression.</p> <p>Unsupervised learning. K-means algorithms.</p>
---------------	--

REFERENCE TEXT BOOKS	<p>Lectures notes will be provided. The teaching material will be made available through the Lecture webpage at formazioneonline.unisalento.it.</p>
