

COMPUTER ENGINEERING (LM55)

(Lecce - Università degli Studi)

Teaching SYSTEM AND NETWORK PROGRAMMING

GenCod A005789

Owner professor Francesco TOMMASI

Teaching in italian SYSTEM AND NETWORK PROGRAMMING

Teaching SYSTEM AND NETWORK PROGRAMMING

SSD code ING-INF/05

Reference course COMPUTER ENGINEERING

Course type Laurea Magistrale

Credits 12.0

Teaching hours Ore-Attività-frontale: 108.0

For enrolled in 2020/2021

Taught in 2020/2021

Course year 1

Language INGLESE

Curriculum PERCORSO COMUNE

Location Lecce

Semester Primo-Semestre

Exam type Orale

Assessment Voto-Finale

Course timetable
<https://easyroom.unisalento.it/Orario>

BRIEF COURSE DESCRIPTION

UNIX System Overview
UNIX Standardization and Implementations
File I/O
Files and Directories
System Data Files and Information
Process Environment
Process Control
Process Relationships
Signals
Threads
Thread Control
Daemon Processes
Advanced I/O
Interprocess Communication
Network IPC: Sockets
Terminal I/O
Cybersecurity
(Disassembling an executable
Following the execution of a process at machine code level
Buffer overflows
Shellcode)

REQUIREMENTS

All the concepts presented in the "Sistemi Operativi" course in the first level degree "Ingegneria dell'Informazione". Namely, a good knowledge of: UNIX® basic concepts, the UNIX® bash shell, bash scripting, main UNIX® commands

COURSE AIMS

Overview

The course aims at starting the students off on programming system applications (e.g. a server) on a UNIX® System.

Learning Outcomes; after the course the student should

- * Know the most important functionalities and facilities offered by a UNIX® system, the System Calls (and, more generally, the APIs) offered to access them.
- * Be able to write efficient CLI (Command Line Interface) system and network applications in the C language.
- * Know how to write interoperable applications by complying with the UNIX® standards (SUSv3, SUSv4).
- * Know which are the main differences between the MacOS and the Linux varieties and how to cope with them.

TEACHING METHODOLOGY

The course is strongly oriented towards an hands-on methodology. Students must follow lectures in front of a computer which must be used to reproduce and test what is explained by the teacher-

ASSESSMENT TYPE

Writing a C program aimed at solving a given problem within a given time. Students are free to consult (paper and digital) texts and to use Internet search engines.

FULL SYLLABUS

UNIX System Overview
UNIX Standardization and Implementations
File I/O
Files and Directories
System Data Files and Information
Process Environment
Process Control
Process Relationships
Signals
Threads
Thread Control
Daemon Processes
Advanced I/O
Interprocess Communication
Network IPC: Sockets
Terminal I/O
Cybersecurity
(Disassembling an executable
Following the execution of a process at machine code level
Buffer overflows
Shellcode)
