BRIEF COURSE DESCRIPTION
The course aims to exemplify the main restoration techniques, through some old and recent examples, the historical evolution of theories and practice of restoration from ancient times to the present days.
During the lessons the following pictorial restoration techniques will be explained: cleaning, consolidation, transport of the pictorial film, integration of the gaps. As regards the sculptural restoration, the following will be dealt with: consolidation, anastylosis and integration. A part of the course will be dedicated to virtual restoration.

REQUIREMENTS
A basic knowledge of the main art techniques is needed. Also a basic knowledge of world's art history is highly recomended.

COURSE AIMS
Through the case studies offered by the historical excursus on the events of restoration, the course aims to develop in students the ability to evaluate the state of conservation of works of art as an indispensable element of historical-critical analysis. Using the study of images, students will be invited to identify and distinguish the original parts from the altered ones and from the integrated or redone ones. Expected learning outcomes 1-Knowledge and understanding: Knowledge of the historical events of restoration from the 16th century to today. Knowledge and understanding of the main theories of restoration; Knowledge of the technical language of the discipline. Theoretical knowledge of artistic techniques and restoration techniques. 2-Ability to apply knowledge and understanding: Ability to recognize the material components of works of art and to identify the main executive techniques and procedures; the ability to recognize the restoration interventions that have already taken place and to envisage any subsequent interventions. 3-Independence of judgment, communication skills and learning ability: Students will be able to elaborate, communicate, present the contents with an appropriate language and using the technical terminology of the discipline, within a discourse based on specific knowledge and argued in a logical and consequential way.
### TEACHING METHODOLOGY
The lessons will be carried out through frontal teaching. Part of the time will be dedicated to reading and discussion texts and images in the classroom.

### ASSESSMENT TYPE
The exam aims to assess the achievement of the following objectives: - Knowledge of the main theories and techniques of restoration. Theoretical knowledge of restoration techniques in use between the 16th and 20th centuries.

### ASSESSMENT SESSIONS
To be agreed

### FULL SYLLABUS
Pictorial restoration techniques:  
- cleaning  
- consolidation  
- transport of the pictorial film,  
- integration of the lacks.

Sculptural restoration techniques:  
- consolidation,  
- anastylosis  
- integration.

A part of the course will be dedicated to virtual restoration.

### REFERENCE TEXT BOOKS
Texts and studying materials will be provided during the lessons.
