### PREREQUISITI

Sufficiency in geometry and linear algebra.

### OBIETTIVI FORMATIVI

#### Overview

Computer aided design aims at developing engineering design skills with a particular focus on the proficient use of modern CAD-integrated analysis tools.

#### Learning Outcomes

After the course the student should be able to

\* acquire detailed knowledge and understanding of the most recent advances in 3D computer aided design.

\* know the fundamental building blocks for creating parametric geometry.

### MODALITA' D'ESAME

The exam consists of two cascaded parts (maximum overall duration: three hours).

The first part is closed book (duration: one hour); the student is asked to illustrate some theoretical topics.

The second part, that starts when the student has completed the first part (duration: two hours), consists in modelling, using CATIA, a given mechanical/aeronautical component and outputting the detail drawing.
